RockSTAR, Science, Technology And Robotics Camp 2016

Wouldn't it be nice to make your own video game where you control what happens or how many points you get for conquering the enemy? Maybe you are interested in learning how electricity works, so you can design your own invention? Would you like to make your older brother or sister do what you say for once? Well, we can't help with that, but we can help you build a robot that will do whatever it is you program it to do.

Paulding County Technology Department is conducting a summer camp that will help you do this and more. Each participant will work with his or her own computer workstation. Learn to work with coding in programs from MIT called "Scratch". You will also have the opportunity to learn coding through Notepad alone.

There will also be plenty of time to interact with LEGO Mindstorms, Ozobots, Cubelets and many more technology themed devices.

Session:	June 13th – 17th
Session Fee:	$150.00 per participant
Ages:	9 – 13 years old, prior to 1/1/2016
Prerequisites:	None
Hours:	8:30AM – 1:00PM
Location:	Hiram High School
Registration Begins / Ends	April 4, 2016 / Until Full
Refunds Available Until	May 27th, 2016 (minus $6 service fee)
